SKILLS

Programming Languages: >Python, JavaScript

Frameworks: Django, Flask, React.js, Next.js

Databases: SQL

State Management: Redux.js

Markup & Styling: HTML5, CSS3, Tailwind CSS, Bootstrap

Summary

Full Stack Developer focused on building clean, functional web apps using Django, React.js, and SQL. Built and deployed several end-to-end projects including admin panels, authentication systems, and payment gateways. Quick learner with a strong passion for solving real-world problems through code.

PROJECT WORK

Puneri Paltan Clone Website

A fully responsive Next.js application styled with Module.CSS and Tailwind CSS, designed to showcase the pride and energy of the Puneri Paltan kabaddi team.

- Next.js & React: SEO-friendly, component-based frontend framework.
- Tailwind CSS: Utility-first styling for fully responsive UI.
- API Integration: Dynamic content like players, videos, and galleries fetched from the backend/API.
- Slug-Based Routing: Clean URLs for individual player profile pages.
- PuneriTv: Match highlights and videos rendered via API data.
- Players & Profiles: Player list and single-view pages populated dynamically.
- Buy Tickets UI: User-friendly ticket booking interface (frontend only).
- Gallery: Dynamic image gallery showcasing team moments.

CERTIFICATE

TRY CATCH CLASSES

PYTHON FULL STACK DEVELOPMENT

Completed the Python Full Stack Developer course with hands-on training in Django, React, and REST APIs.

LANGUAGES

- English | Hindi

- Responsive Design: Optimized for all screen sizes using Tailwind CSS.
- Link: <https://puneri-paltan1.netlify.app>

Enno Clone Project

A modern, responsive clone of the Enno template rebuilt using React.js and CSS Modules, delivering a clean and modular frontend experience.

- **React.js:** Component-based architecture for reusability and maintainability.
- **CSS Modules:** Scoped and maintainable styling without conflicts.
- **Responsive UI:** Optimized for desktops, tablets, and mobile devices.
- **Performance Focused:** Lightweight, fast, and SEO-friendly structure.
- **Modern Frontend Practices:** Implemented reusable components, props handling, and modular CSS structure.

E-commerce Admin Dashboard

ReactJS frontend styled with Bootstrap, using DummyJSON API for authentication and mock-api for mock data.

- User Authentication: Login system implemented with DummyJSON API.
- Product Management: Add, edit, view, and delete products using custom UI.
- Category Management: Organize products into categories with CRUD operations.
- Bootstrap UI: Clean, responsive design using Bootstrap components.
- Responsive Layout: Mobile-first design that adapts to all screen sizes.
